CNO N45 INTRODUCES A NEW LOGO

The Chief of Naval Operations' Environmental Protection, Safety and Occupational Health Division (CNO N45) has developed a new logo for use on publications, briefings, and display materials in support of the Navy's environmental message.

The colorful logo features a realistic aircraft carrier steaming ahead and a bald eagle with wings outstretched above the carrier, flying in the same direction. Behind the eagle and carrier is a graphic representation of the Earth.

The aircraft carrier is the centerpiece of the modern naval battle group, so the logo's carrier graphic represents the U.S. Navy's operating forces. The bald eagle has a dual purpose - as our nation's symbol and as a representation of Earth's environment, specifically as a species that has recovered from the threat of extinction. The Earth in the background represents the Navy's presence throughout the world and our commitment to protecting that global environment for future generations.

The logo is available in high-resolution format on the web at <http://enviro.navy.mil/n45>. Click on the "Public Affairs" link to access the logo.
